

“Let's take off our shoes and socks first,” she said, smiling, a curious and inquisitive expression on her soft, round face. We released our hands and bent forward and took off our shoes and socks. I was the first to finish, as I just tossed shoes and socks to the floor, but she set her shoes down, put her socks inside her shoes and carefully slid them under the bed as she glanced around the room. She flashed me a smile as she sat up, scooted back on the bed to lift her legs from the floor, turned her body parallel to the bed and scooted up toward the head of the bed, still sitting up. She left me room next to her against the wall and I scooted to that position.

We twisted our bodies toward each other and I slipped my right arm around her waist. I felt her hands rest at my waist and we moved our faces closer until we could feel the other's lips and we slowly, deliberately took turns gently squeezing a lip between our two lips. As I felt her hands slide over my chest to rest over my shoulders and rub the back of my head, I felt her mouth open and I plunged my tongue inside her mouth and felt her tongue push back. Back and forth our heads tilted so that we could move our mouths and lips and tongues in different positions, sometimes breaking free and kissing over the other's cheek, returning to that mouth and opening it up again.

I gently rubbed and squeezed my left hand over her stomach and slowly moved it up over her Mexican-style cotton blouse to her right breast and opened my hand under her breast to cup it. Gently, I squeezed the bottom of her breast and I could hear her sigh a bit louder and her mouth and head move a little more aggressively. That reaction I took as a 'go' sign, so I rubbed and squeezed my hand over her right breast harder and harder. Our tongues engaged continuously, yielding so the other tongue could push inside and back again. Soon, I rubbed my hand over her bare chest to her left breast and slightly inside her blouse so that I could feel her soft brassiere underneath. I could feel her body wriggle and squirm with the growing intensity and her breathing was faster and more audible.
